SUMMERY

I am a second-year college student currently enrolled in a co-op program, seeking an internship front-end developer role to gain practical industry experience. I am proficient in HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, and JavaScript, with a strong focus on React.js. Also familiar with backend development using Node.js.

EXPERIENCE

FRONT END DEVELOPER

Freelance && Outsourced Projects   **07.2022 - 09.2024**

- Developed and maintained responsive websites for multiple clients using HTML5, CSS, JavaScript, and React.js.
- Built interactive UIs and optimized performance through the use of modern front-end technologies like Tailwind CSS and Bootstrap.
- Collaborated with clients to understand their needs, delivering solutions that improved user experience and increased client satisfaction.
- Created customized web applications tailored to client specifications, focusing on responsive design and dynamic functionalities.
- Contributed to various other projects that involved C#, C++, Python, and Git version control.
- Developed user-friendly web forms with validation and error handling.
- Conceived and built optimized landing pages in HTML and CSS for integration and cross-browser compatibility.
- Creating website with great parallax effect and enjoyable animations
